PRESS RELEASE

September 2010

HOW PROVIDE ENVIRONMENTAL EXPERTISE IN WREXHAM

Plans have now been submitted for Green Plan Energy's biomass plant in Wrexham; an application which is supported by a detailed ecological framework and landscaping strategy that has been prepared by HOW Planning's environmental team.

The Manchester based consultancy was approached by Green Plan Energy to assist with the co-ordination of planning application for the site which is located on Bryn Lane within the Wrexham Industrial Estate and to assess and advise on the site's environmental constraints and features that needed to be taken into account in developing the scheme.

HOW has project managed the application, bringing together the various technical reports ensuring that the reports contained the most appropriate and accurate environmental information required for a sensitive application such as this. HOW also prepared the Supporting Planning Statement which outlined a detailed scheme description and assessed the proposals against relevant planning policy.

Says Elizabeth Lees, Environmental Consultant at HOW: "There is more and more talk about the future of the UK's energy supplies and a real focus on becoming more self-reliant. This is a really exciting application as the proposed development will deliver a fantastic renewable energy facility for Wrexham."
