## Four Applications Made for Major Regeneration Scheme

**Project:** Park Green  
**Client:** Infinity Number Two Ltd and PH Property Holdings  
**Location:** Macclesfield

HOW Planning have submitted a total of four planning applications on behalf of two separate clients for an extensive regeneration scheme in the Park Green area of Macclesfield.

Acting on behalf of Infinity Number Two Ltd, HOW has made three applications for the conversion of the Grade II listed Georgian Mill and the replacement of the Georgian Mill extension and neighbouring Waterside Mill for high quality office developments.

## Continued...

A Conservation Area Consent Application has been submitted for the demolition of the 1970s extension at Georgian Mill and Waterside Mill, along with a Listed Building Application for the proposed internal and external alterations to the Grade II listed building required as part of the office conversion.

A final application has been made on behalf of PH Property Holdings for a mixed use development combining office and residential accommodation. Park Green Mill will be demolished and replaced with a 3 storey building accommodating 31 residential apartments along with 227 sq m of office space.

Says Jon Suckley, Principal at HOW Planning:

“The preparation of the planning applications for our clients has been a fairly complex process, but the combined developments will create a major regeneration scheme for the area. The plans maximise the opportunity presented by the redundant mills whilst significantly contributing to the character of the Park Green conservation area.”
